

1. Thread the power cord into the first iron tube and fix it on the lamp body.
2. Thread another section of iron pipe into the iron pipe fixed to the lamp body, and thread the power cord into the disc and tighten it onto the iron pipe.
3. Fix the suspension plate to the ceiling with screws.
4. Connect the power cord and ground wire: black represents the live wire (L), white represents the neutral wire (N), and bare copper represents the ground wire (E), and tighten it with a nut.
5. Cover the disc on the suspension board (the screws of the suspension board expose the disc surface from the ceiling) and then firmly lock the disc onto the suspension board with floral nuts.
6. Insert the light bulbs one by one into the lamp holder, and then screw on the glass balls one by one (be careful not to twist them forcefully when installing the glass to avoid glass breakage)

Attention :

- 1 . Please cut off the power supply before installation to prevent electricshock (installation by certified electrician is recommended)
- 2 . Due to the different display , the actual color can be different fromthe image.
- 3 . Due to the manual measurement of lamp body sizethere may be a deviation of 1 / 2 inch .
- 4 . If you have any questions or lost parts , please feel free to contactus and we will try our best to help you.
